PROFESSIONAL SUMMARY

Computer Science undergraduate at Punjab Engineering College with hands-on experience in web development, data analysis, and applied machine learning through internships, research, and independent projects. Skilled in React, Python, and cloud-adjacent tools, with a track record of shipping production-ready features and translating technical work into clear outcomes.

Degree/Board	Year	Institute	CGPA
B.Tech Computer Science Engg.	2023-2027	Punjab Engineering College, Chandigarh	7.54/10
12th (CBSE)	2023	Gurukul Global School, Chandigarh	90%
10th (CBSE)	2021	Gurukul Global School, Chandigarh	96%

EXPERIENCE

HR Technology Intern | myHQ (by ANAROCK)

- Developed production-ready web applications using Supabase, Firebase, and JavaScript. Managed talent acquisition, competitor analysis using Apollo, Clay, Dripify, and Expandi, and automated Excel workflows with Google Apps Script.

Web Development Intern | Elite Web Technologies

- Contributed to front-end development by identifying and resolving technical and visual bugs on their live client website. Collaborated closely with the design team to align UI/UX standards, gaining exposure to corporate workflows, version control, and time-bound project management.

Research Project

- Designed a computational workflow using AutoDock and COMSOL to simulate, test, and analyze chemical interactions, streamlining a previously manual-intensive process. Handled large simulation datasets, leveraging a Gibbs free energy-based ranking system to identify and prioritize the most effective ligand-target complexes for validation. Created 3D visualizations with BIOVIA Discovery Studio to distill simulation results and present insights clearly to the research team. This approach accelerated the R&D process by several months, cut experimental costs, and helped the lab focus on the most promising compounds.

PROJECTS

Personal Resume Website

- Built and deployed a responsive React.js portfolio featuring custom CSS and modular components; integrated an EmailJS-powered contact form with smooth scrolling; configured and deployed on Vercel, linking it to a custom domain. ([link - www.shivingoyal.site](http://www.shivingoyal.site))

Chat with YouTube

- Developed an AI-powered Streamlit application to analyze YouTube videos using Gemini LLM, transcripts, and key frames. Implemented semantic search with sentence embeddings, enabling real-time Q&A and video summarization. ([link - Github](#))

Medical Image Fusion

- Engineered a PyTorch-based Adaptive U-Net featuring dual-path encoders, residual attention blocks, and learnable Gaussian filtering to fuse CT and MRI modalities. Implemented uncertainty estimation and multi-scale deep supervision, validated via clinical metrics such as CNR and SNR. ([link - Github](#))

SKILLS

- Languages:** C, C++, Python, HTML, CSS, SQL.
- Frameworks/Tools:** React, Next.js, Streamlit, AutoCAD, COMSOL, Git, AWS.
- Concepts:** DSA, OOP, ML, Web Deployment, Power BI, Neural Networks, Business Analysis, CBAP.

LEADERSHIP

- Sub-head of Event Coordination and Logistics for the Women Empowerment Cell at PEC.
- Class Representative, Department of Computer Science.
- Helped organize and manage an AICTE-sponsored international conference at PEC.
- Member of the Implementation Body (ISB) for the PEC IEEE Student Chapter.
- Organized Technical Display for TECHADROIT 2024 held at PEC IEEE.

ACHIEVEMENTS

- Represented Team India internationally in inline hockey at Roccaraso, Italy.
- www.simplilearn.com, Getting Started with AWS Services Fundamentals for Beginners, covering core Amazon Web Services (AWS) concepts.
- www.simplilearn.com, Business Analysis Basics, covering the fundamentals of business analysis techniques and processes.
- www.simplilearn.com, Introduction to CBAP, introducing Certified Business Analysis Professional standards and methodologies.
- www.udemy.com, Complete Data Analyst Bootcamp From Basics To Advanced, covering Python, SQL, Power BI, and data analysis methodologies.
- <https://hack2skill.com>, Gen AI Academy Completion Certificate on Hack2Skill.
- <https://www.credly.com>, Earned 15 badges for completion of the GDSC Gen AI Study Jams 2024.
- <https://coursera.org>, Coursera Certificate: Neural Networks and Deep Learning.
- <https://coursera.org>, Coursera Certificate: Improving Deep Neural Networks.
- <https://coursera.org>, Coursera Certificate: Structuring Machine Learning Projects.
- <https://coursera.org>, Coursera Certificate: C++ For C Programmers.
- Achieved numerous victories in national and state-level championships for speed skating and inline hockey.
- Won state-level titles in calisthenics and cycling.
- Engineered robot for WRO, incorporating advanced sensor fusion algorithms, among 200+ participating teams.
- Awarded over 100 medals in various disciplines.
- Received multiple certificates in recognition of contributions to social events and NGOs.
